

EDUCATION

BSc in Applied Mathematics and Computer Science, IV year

- **Lomonosov Moscow State University** September 2015 – June 2019
Faculty of Computational Mathematics and Cybernetics, GPA 4.85 / 5.0

Continuing with the Master's degree afterwards, expected graduation in 2021

EXPERIENCE

- **Voice technology department of Yandex** June 2018 – October 2018
Software Engineering Intern
 - Implemented several methods of probability smoothing and their modification in language models for Automatic Speech Recognition
 - Carried out experiments on quality measurement to find the best model among all
 - Implemented an optimal algorithm for constructing n-gram language models in C++ using MapReduce, **which decreased wall time by at least 3 times and slightly increased quality measure comparing to the baseline**
 - Wrote a complete framework with a set of operations available from CLI

PROJECTS

- **BigARTM (C++ Boost/STL, Protobuf, Travis, AppVeyor)** January 2017 – present
Open Source library for topic modelling
🌐 github.com/bigartm/bigartm
 - Developed a tool for parallel calculation of pairwise word statistics such as frequency of mutual occurrence, PMI in text collections of unlimited size
Wikipedia full text processing takes 6 hours on a laptop with quad core AMD A6

OTHER EXPERIENCE

- **Primality test (C++)**
Implementation of Miller test for deterministic checking of large numbers for primality as part of the [Kaspersky Lab](#) information security course
Wall time on prime numbers of length 100 is about 4 seconds
🌐 github.com/MichaelSolotky/sandbox/tree/master/Cpp_old_tasks/Primality_tests
- **ML (NumPy, Scipy)**
Implementation of various ML algorithms from scratch
🌐 github.com/MichaelSolotky/sandbox/tree/master/ML

TECHNICAL SKILLS

- **Used at work:** C++, Python, C, Bash
- **Basic knowledge:** SQL, Assembly language
- **Technologies:** C++ Boost, CMake, Make, Protobuf, MapReduce, SciPy, Scikit-learn, NumPy, Pandas, Pytorch
- **Tools:** Git, Subversion, UNIX/Linux, Travis, AppVeyor, L^AT_EX
